SUMMARY

I am currently working as a Web Developer at Priory Direct, an eco-friendly packaging company. Our products are offered through an e-commerce platform, where I primarily focus on the front-end but also handle full-stack tasks when needed to implement new features.

I am ambitious, eager to learn, and adaptable, with a strong drive to master new technologies and processes. My excellent communication skills have been honed through teamwork and direct client interactions, handling queries and resolving issues. I thrive in deadline-driven environments, demonstrating a strong work ethic and effective organizational skills.

SKILLS

- HTML
- CSS/LESS
- Javascript/JQuery
- Angular
- Bootstrap 4/5
- Git / Git Branches
- Experience implementing APIs

- ASP.net Webforms
- ASP.net MVC
- Visual Basic
- NoSQL
- SQL
- Experience dealing with and keeping to strict deadlines
- Experience working in a team

PORTFOLIO

Luddesdowne Cricket Club | HTML, CSS, Django, Python, SQL
I built the website for my cricket club using my knowledge gained through my course and via my work. The website has a small CMS that allows for the social secretaries interact and to add events, fixtures are also picked up via an API call to play cricket.

Web Page - https://www.luddesdownecc.co.uk/

Visit Corfu | HTML, CSS
My first project in my course using **HTML, CSS** and **Bootstrap** to bring together a website to promote the tourism of the Greek Island of Corfu.

Code Base - https://github.com/Baldpet/visit-corfu

XCom2: Class Calculator & Memory Game | HTML, CSS, Javascript
My Second Project in my course I built upon my knowledge of **HTML** and **CSS** incorporating interactivity for the user using **Javascript**.
The idea of the site was to give users the ability to pre-plan their soldier builds in Xcom2.
I also built a themed matching memory game with a twist that finding the aliens made you lose.

Code Base - https://github.com/Baldpet/LW2-Class-Calculator

Animable | HTML, CSS, Javascript | Group Content
I participated in the Code Institute Hackathon in July 2020, our brief was to highlight or solve an issue that had been caused by Covid-19. We created a website that could be used to help animals that had been adversely affected.
As a team, we worked together through discussion, planning and implementation of the site. I then presented the project to the rest of the participants and judges over video call where we ranked third in our category.

References available on request.

OTHER INTERESTS

My interests include:
- Gaming
- Cricket

I was the social secretary for my cricket club 2016 – 2019. During this time, I organized many social and fundraising events including 2 cricket tours for the club (Cheltenham/Isle of White).

Whilst Social Secretary I set up a fantasy cricket league for our club members which I still run today.

I have a full clean driving license.

I can speak and understand Greek in addition to my native language English.
